HopgoodGanim's [Intellectual Property and Technology](#) team advised [For The Record](#) (**FTR**) on their successful patent applications for Blockchain Verified Recordings in Australia and the United States.

The invention relates to a system and method for ensuring the integrity of a recording using blockchain technology. This provides a reliable way in which to independently verify that an electronic recording file is accurate and unaltered.

With the award of this patent, For The Record will be unique in offering this critical component of security to original source recordings utilised throughout the entire justice system.
